Residential Communities

Permanent monument signage just got better!

Fast and easy installation! No special equipment. No foundation required. Simple PVC sleeves for mounting on imbedded pipes.

Choose from three different shapes, three attractive finishes and two sizes of LED displays.

The most innovative design, fabrication and finishing techniques, now with changeable-message LED inserts.

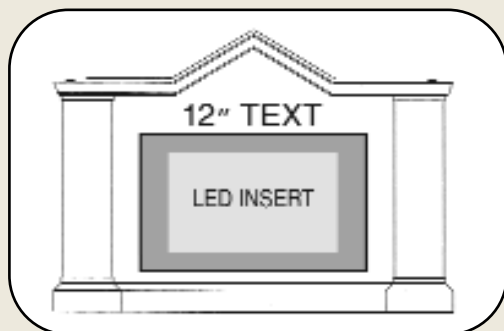

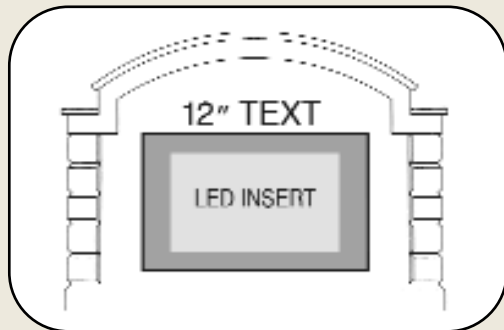

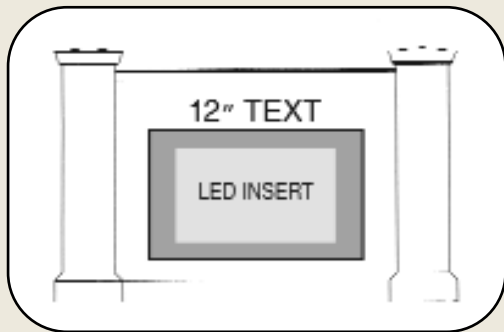

Inexpensive to purchase; inexpensive to install; inexpensive to operate! Low power consumption LED technology means low energy bills (120 volt power required at site). Costs less than a 100 watt light bulb to operate.

Strong and durable monument sign is constructed using a three layer system: An expanded polystyrene core, shielded with Armor-Coat® and covered with a weather and impact resistant exterior finish.

Messages can be changed remotely from your computer or by using the easy-to-operate controller.

Make your signage do more with changeable messages. Dynamic communication!
